The BRABUS Shadow 1000 — the fastest superboat ever built by BRABUS Marine — delivers blistering acceleration, razor-sharp handling, and unmatched craftsmanship. As the boldest evolution of the Shadow line, it redefines the limits of luxury performance on the water. While the Shadow 900 remains a favorite for long-range cruising in comfort and style, the new Shadow 1000 takes performance and presence to an entirely new level — a true Grand Tourer of the seas.

”
